**HENDERSON GLOBAL INVESTORS
LAUNCHES INDUSTRIES OF THE FUTURE FUND**

CHICAGO, September 2, 2008 — Henderson Global Investors, the global asset management company, has announced the launch of the Henderson Industries of the Future Fund on August 29, 2008. The Fund seeks to invest in companies that contribute to an environmentally sustainable and socially responsible global economy on the premise that over the coming years, sustainable development will be a critical success factor and that social or environmental leaders will be most likely to harness the rewards of early adaptation to sustainability's challenges.

The Fund will invest in themes identified as "Industries of the Future" which are based on sustainability trends and challenges, to include cleaner energy, environmental services, health and sustainable transport. The Fund's strategy will mirror that of a Henderson fund available in the UK since 1995, run by the same portfolio management team.

Sean Dranfield, Director of Retail Distribution, says, "We are very pleased to be launching another Henderson Fund which we believe offers a differentiated, bottom-up approach to global investing. The Industries of the Future Fund is particularly exciting because Henderson has been managing sustainable and responsible investment strategies since 1977, so we bring a wealth of experience and expertise in this arena to our shareholders."

The Henderson Global Funds family includes eight other load mutual funds: the European Focus Fund, Global Equity Income Fund, Global Opportunities Fund, Global Technology Fund, International Opportunities Fund, Japan-Asia Focus Fund, US Focus Fund and Worldwide Income Fund. The company also has two international separately managed accounts products which are available to retail investors.

As Henderson's fund offerings have grown, the firm has retained a focus on bringing its global investment expertise to US investors. Total assets under management in the eight existing Henderson funds totalled approximately \$6 billion as of July 31, 2008.

About Henderson Global Investors

Henderson Global Investors is an investment management company providing a wide range of investment products and services to institutions and individuals in Asia, Europe and North America. Henderson manages \$104.7 billion¹ (as of June 30, 2008) in assets and employs approximately 900 people in 16 offices worldwide.

Henderson Global Investors (North America) Inc., a subsidiary of Henderson Group plc, was established in 1999 when Henderson acquired Phoenix Realty Advisors. Today, it has both retail and institutional distribution capabilities for property and listed equities. The first Henderson Global Funds – European Focus, Global Technology and International Opportunities – were launched on August 31, 2001, with the goal of providing US investors with exposure to global markets.

¹The \$104.7 billion references Henderson's assets under management as of 6/30/08 which are comprised of discretionary, non-discretionary and other assets. "Henderson Global Investors" and "Henderson" are the names under which various subsidiaries of Henderson Group plc, a UK limited company, provide investment products and services.

Before investing you should carefully consider the Funds' investment objectives, risks, charges and expenses. This and other information is in the prospectus, a copy of which may be obtained for free by calling 1.866.443.6337 or visiting the Funds' website at www.hendersonglobalinvestors.com. Please read the prospectus carefully before you invest.

International investing involves certain risks and increased volatility not associated with investing solely in the US. These include currency fluctuations, economic or financial instability, lack of timely or reliable financial information or unfavourable political or legal developments. In addition, the Funds may invest in a limited geographic area or in a small number of issuers. As such, investing in the Funds may involve greater risk and volatility than investing in a more diversified fund. Technology companies may react similarly to certain market pressures and events. This may be significantly affected by short product cycles, aggressive pricing of products and services, competition from new market entrants, and obsolescence of existing technology. As a result, the Global Technology Fund's returns may be considerably more volatile than a fund that does not invest in technology companies.

The Industries of the Future Fund invests in securities of companies that meet its "Industries of the Future" guidelines. As a result, investing in these securities may entail greater risk and volatility than investing in a wide variety of economic themes.
