A sub-fund of Henderson Investment Funds Series IV, an OEIC managed by Henderson Investment Funds Limited.

Objectives and investment policy

Objective

An absolute (more than zero) return, typically over a 12-month period, although an absolute return performance is not guaranteed.

Investment policy

Under normal circumstances, the Fund invests mainly in:

- Collective Investment Schemes (funds that invest in shares, bonds, and other securities from the UK and elsewhere)

The Fund may also invest in:

- Exchange Traded Funds
- Money market instruments
- Bank deposits

In choosing investments, the investment manager looks for funds that invest in various asset classes based on market and economic research. The Fund may use investment techniques, including some that involve derivatives, for efficient portfolio management or to manage risks.

Designed for Investors who understand the Fund's risks and complex investment approach, would like an absolute return investment and intend to invest their money for at least five years.

Derivatives Financial instruments whose value is linked to the price of an underlying asset (eg indices, rates, share prices).

Money market instruments Liquid investments that pay interest and are designed to maintain a stable value.

Shares Securities that represent fractional ownership in a company.

Volatility How sharply the Fund's share price has gone up and down over a period, generally several years.

The Fund offers accumulation shares (shares in which net income is retained within the price).

Risk and reward profile

The value of an investment in the Fund can go up or down. When you sell your shares they may be worth less than you paid for them.

The risk/reward rating above is based on medium-term volatility. In the future, the Fund's actual volatility could be higher or lower and its rated risk/reward level could change.

The lowest category does not mean risk free.

The Fund's risk level reflects the following:

- The Fund invests in, or otherwise gains exposure to, a mix of different asset classes
- Fluctuations in exchange rates may cause the value of your investment to rise or fall

The rating does not reflect the possible effects of unusual market conditions or large unpredictable events which could amplify everyday risk and trigger other risks such as:

Counterparty risk The Fund could lose money if an entity with which it interacts becomes unwilling or unable to meet its obligations to the Fund.

Derivatives risk Certain derivatives could behave unexpectedly or could expose the Fund to losses that are significantly greater than the cost of the derivative.

Focus risk The Fund's value may fall where it has concentrated exposure to an issuer or type of security that is heavily affected by an adverse event.

Liquidity risk Certain securities could become hard to value or sell at a desired time and price.

Management risk Investment management techniques that have worked well in normal market conditions could prove ineffective or detrimental at other times.

The full list of the Fund's risks are contained in the "Risk Factors" section of the Fund's prospectus.
